

# HOPKIRK

**Course:** A course comprising 5 pegs and a "box" is set out as shown below. The distances for the course will be dependent upon the area available. The three sides of the box are to be made from blocks and poles. Cavilettis are not to be used.

The positions of the start/finish line, pegs and cavilettis are to be marked permanently for the entire fixture.

**Event:** Standing start.

The rider will turn right around the first peg, reverse into the box until all 4 legs of the horse are behind the front of the box, turn around the back of the box, bend through the line of pegs and complete a full left hand turn around the last peg before crossing the finish line.

Elimination will result from:

- error of course,
- knocking down a peg.

This is a timed event. Horses are to be timed on the nose crossing the start and finish lines.

No rider is to be on the event course prior to the event.
